

ESDEC API UPDATES Q2 2023

Here is the second newsletter for all our Esdec calculator-API partners. Four times a year we will inform you about the most recent updates regarding our calculator, about new components of our mounting systems or about new application possibilities. And we include the price list that will apply for the coming quarter.

FEEDBACK

With these periodic updates we try to make it as easy as possible for you to set up your link with the Esdec calculator effectively and efficiently. And of course we are also curious about your ongoing feedback or suggestions for improving our API connection, communication and/or cooperation in general. You can do so by e-mail at n.lubbers@esdecgroup.com or by telephone at +31 (0)85 070 2000.

ADDITIONS

In this first newsletter an update of everything that has been changed, added and adjusted in the API in 2022. (More explanation on how to implement the changes below can be found in the [Swagger documentation](#))

- The 3.6 kg concrete brick can now be selected as a ballast unit. This ballast unit is common in Germany and has the same dimensions as the 4 kg concrete brick that is used as standard.
- The side plates for FlatFix Wave Plus are temporarily unavailable. When you calculate with side plates via the API, you will receive an error that the side plates are not available. Available again on May 1, 2023.
- You can now give a reference to a roof so the user can recognize the roof in the output.

SCHEDULED ADDITIONS 2023

Below is an overview of additions and changes, expected for the first and second quarter of this year.

- The wind and snow loads for the new and some existing countries are expected to go live in early May (see previous newsletter). We ask you to implement the snow variables for Portugal, Spain, Belgium and France before July 1.
- New FlatFix Wave Plus side plates available again from 1 May.
- ClickFit EVO for Slate roofs will be launched later this year and will also be available via the calculator API. The exact launch date is not yet known.

Disclaimer: All above dates are subject to change.

PRICE LIST

[Here the link](#) to the price list of this quarter (Q2). In the next mailing we will share the Q3 price list with you.

FEEDBACK

With these periodic updates we try to make it as easy as possible for you to set up your link with the Esdec calculator effectively and efficiently. And of course, we are also curious about your ongoing

feedback or suggestions for improving our API connection, communication and/or cooperation in general. You can do so by e-mail at n.lubbers@esdecgroup.com or by telephone at +31 (0)85 070 2000.

We hope to have informed you sufficiently with this.

PS is your colleague not on the mailing list of this newsletter? Send an email to marketing@esdec.com and we'll fix it.
