

## Esdec – PanelClaw API UPDATES Q3 2024

With the summer holidays just around the corner, we would like to share some more important updates with you about the calculator, new components of our mounting systems and new application possibilities.

- [Check the previous updates](#)

### Q2 API-updates and bug fixes

#### Additions

- Our latest country specific annex added to the Esdec Calculator is Ireland;
- Recently at Esdec, we launched the MLPE-clip, which stands for Module-Level Power Electronics and includes optimizers and microinverters;
- From now on, Esdec's ClickFit EVO can be calculated on steel tiled sheets;
- CPX is rebranded to PanelClaw including a new website <https://panelclaw.eu>;
- Wave support mats for PanelClaw Wave are available;
- Snow loads are enforced for Belgium, France, Spain and Portugal.

#### Looking ahead

- Esdec's ClickFit EVO roof hook pro (August '24)
- PanelClaw Wave Lightning protection system – LPS (September '24)
- Concrete roof cover will be separated from other;
- Gross prices will be returned in the API-response.

#### Feedback

We find it important to keep you updated and make it as easy as possible for you to set up your link with the Esdec Calculator and PanelClaw Calculator effectively and efficiently. Of course, we are also curious about your comments, feedback and suggestions for improving our API-connection, communications and cooperation in general. Please feel free to share your thoughts by sending an e-mail to [niels.lubbers@enstall.com](mailto:niels.lubbers@enstall.com) or [gal.roter@enstall.com](mailto:gal.roter@enstall.com) For now, we hope to have informed you sufficiently with this e-mail.

*PS: is your colleague not yet on the mailing list of this newsletter? Then please send an e-mail with all details to [marketing@esdec.com](mailto:marketing@esdec.com), so we can fix it.*
